

Smart Living, Perfectly Balanced.

Smart Comfort That Welcomes You Home

Personalised climate control and enhanced energy efficiency with individual room temperature settings for new or existing air conditioning systems.

Smart Zoning

Transforming Ducted AC Systems into Smart Zoned Climate Control Systems

Smart Zoning divides your home into distinct temperature zones, delivering personalised comfort throughout your living spaces. Every family member enjoys their ideal temperature and airflow in any room.

Smart Zoning allows you to shut off airflow to unused rooms, significantly cutting energy use and lowering power bills.

By delivering conditioned air precisely where it's needed, Smart Zoning eliminates waste while maintaining ideal comfort in every occupied space.

Comfort Across Every Zone

iZone's climate control system brings personalised comfort to each room. With precise airflow control, automatic adjustments, custom scenes, and smart sensors, every space feels just right.

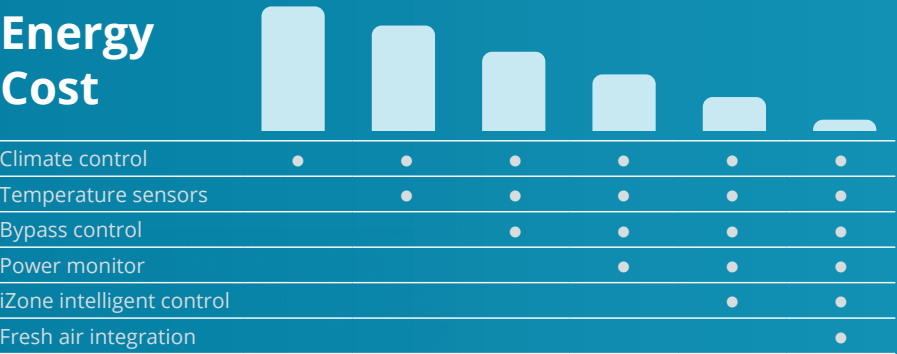

From warming bedrooms to cooling living areas, iZone creates ideal environments while conserving energy by focusing only on the rooms you use.

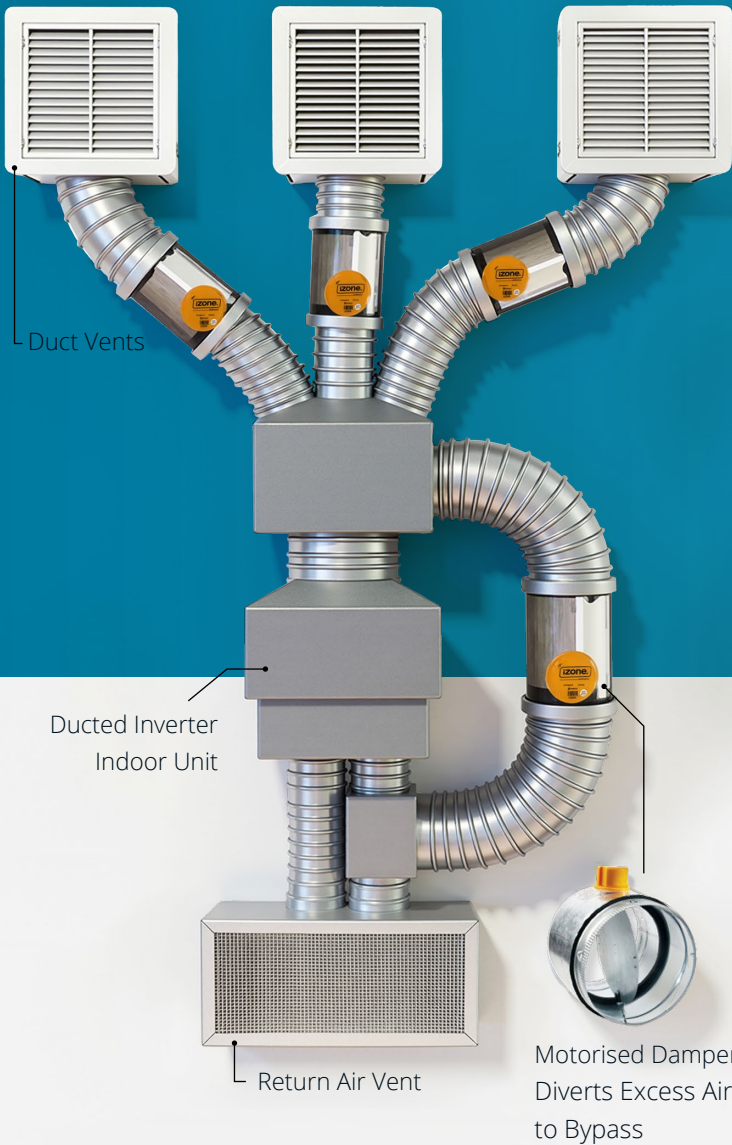

Exceptional Energy Savings

Less Power, More Comfort

Your iZone Smart Home System can deliver up to 64% savings on running costs while shrinking your carbon footprint by as much as 68%*. Our intelligent temperature management provides both instant savings and long-term efficiency.

*Based on research conducted through the University of Western Australia in collaboration with iZone.

Intelligent Temperature Sensors

Our advanced wireless sensors direct conditioned air with precision, ensuring rooms reach desired temperatures quickly. Unlike conventional systems, iZone continuously monitors all sensors to optimise each room's comfort independently.

Once all rooms reach their target temperatures, the iZone system automatically reduces compressor activity, lowering energy consumption and running costs.

Bypass Control

The bypass diverts already conditioned air back into the return air stream. This mixed air is redistributed to zones that still require cooling or heating, enabling faster temperature regulation and reducing overall energy consumption.

Intelligent Control

Smart Power Monitoring
See exactly what each appliance consumes and align usage with lower cost tariff periods to minimise bills. Solar system owners can maximise savings by scheduling appliances during peak daylight hours.

Min/Max Set Points
Set comfortable temperature boundaries (for example, 22 to 24°C) so the system adjusts only within that range. iZone smartly manages energy while you stay perfectly comfortable, significantly reducing your power bills.

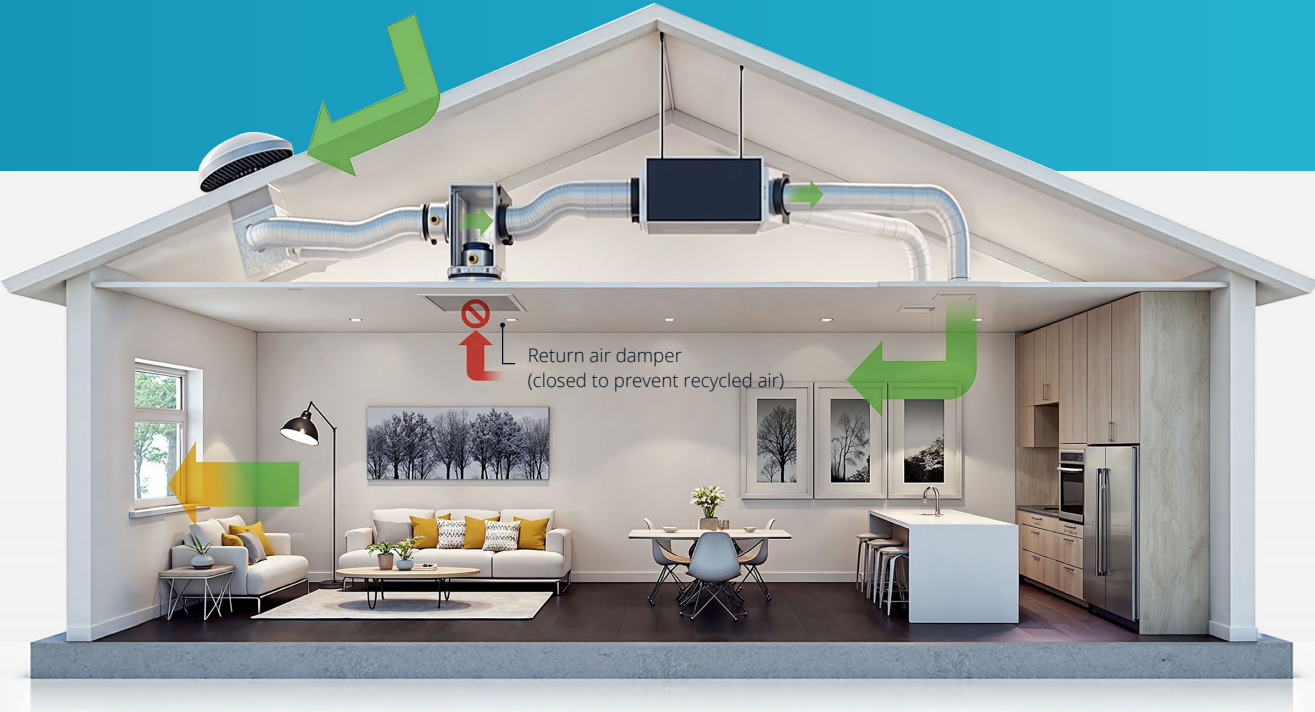

Scrooge Mode
Activate Scrooge mode to let everyone in your home see their chosen temperature while hidden safeguards lock in your preset limits. This balances their sense of freedom with true efficiency, resulting in lower power bills overall.

Fan Auto
Automatically adjusts the fan speed based on which zones are open. This optimises airflow distribution, delivering exactly what each space needs while maximising efficiency and savings.

Smart Home Device Integration
Connect iZone devices to control lighting, irrigation, garage doors and more from one interface. This seamless integration creates effortless living while delivering savings across your connected home.

Fresh Air Integration

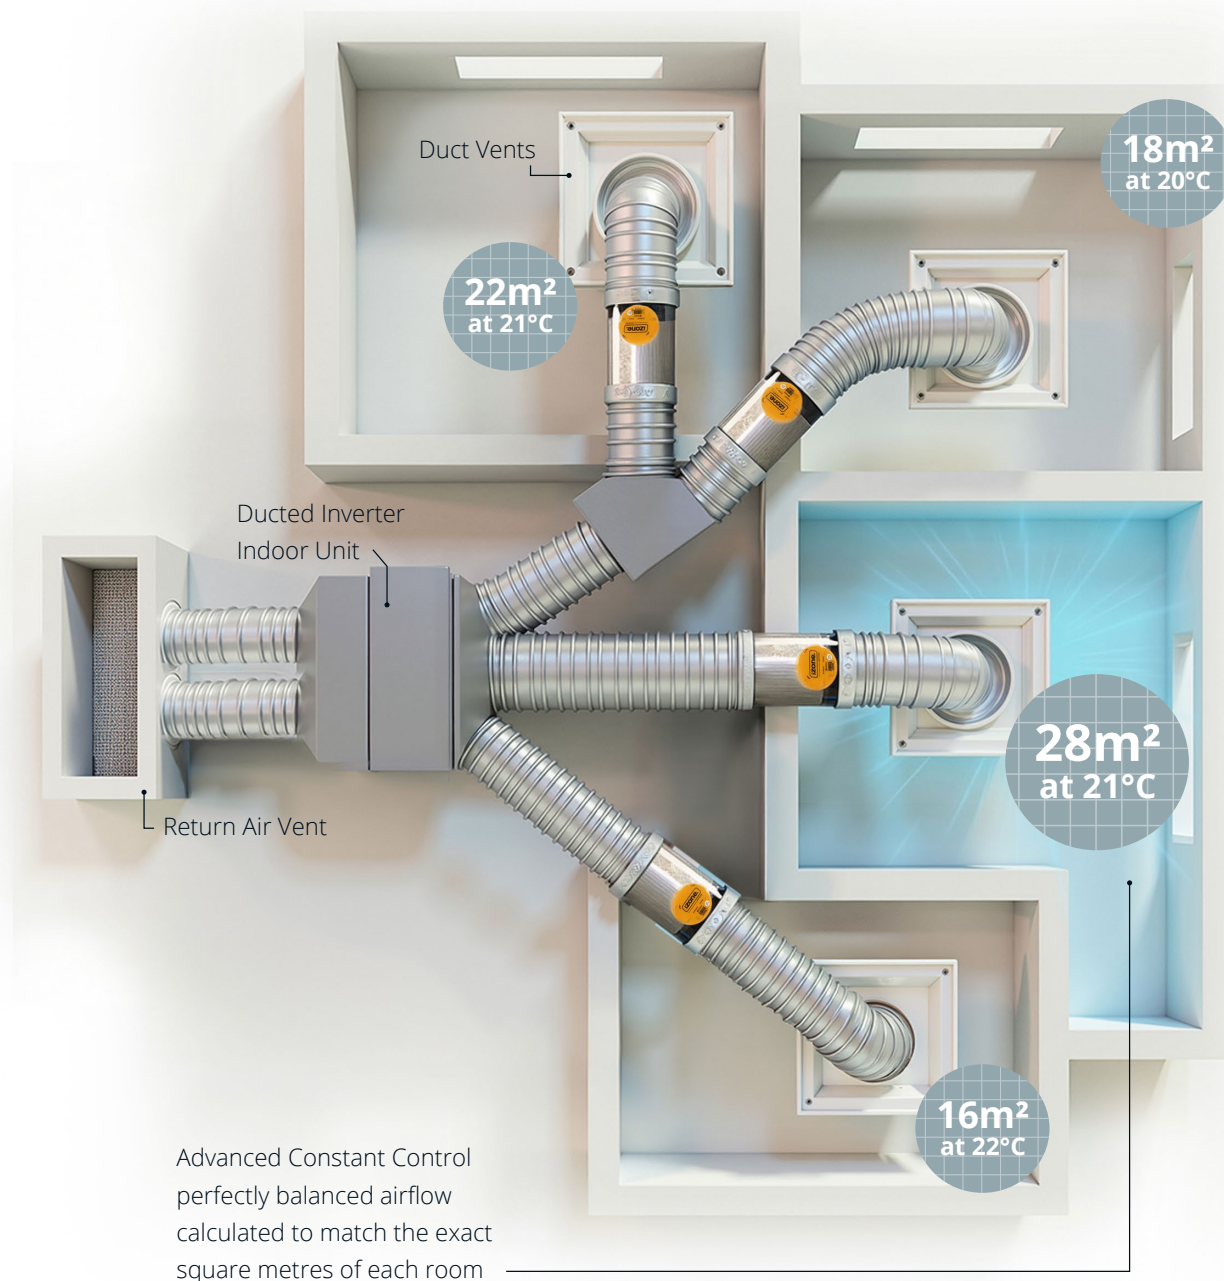

Our innovative cooling system uses cool outside air instead of your air conditioner, creating naturally refreshed spaces on warm nights. Discuss this energy saving option with your iZone installer when installing your air conditioning system.

Perfectly Balanced

Advanced Constant Control, a Backbone to Precision Control

iZone's Advanced Constant Control calculates airflow requirements from room dimensions, adjusting fan speed and redirecting excess air through a constant or bypass. This ensures precise temperature regulation while maximising efficiency across zones. The Nova Climate Control System delivers airflow from 0% to 100%, calculating the exact volume each room needs based on the size of the room for optimal distribution. At iZone, we recognise every room has its own character and deserves individual attention, which is why our Smart Airflow adapts intelligently to your unique floor plan.

Compatible with Your Favourite Brands

iZone's climate control systems are compatible with leading ducted air conditioning brands, ensuring seamless integration.

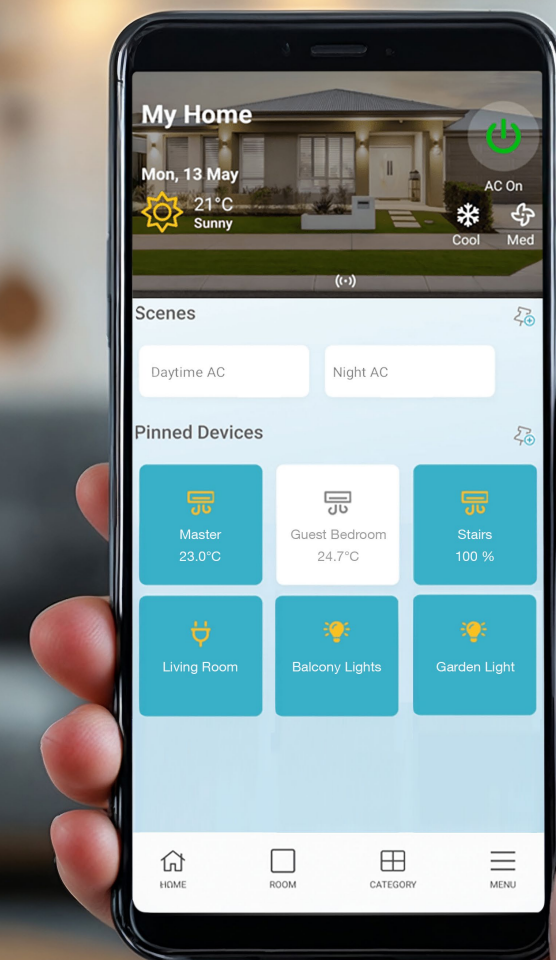

Your Space, Your Comfort, Uniquely Yours

Personalised Comfort

At iZone, we believe each person deserves a climate experience as individual as they are. Why settle for systems that cannot adapt to your unique lifestyle?

- Choose controllers to match your style and budget
- Set perfect temperatures in each room
- Control climate zone by zone with precision
- Experience airflow that adapts to each room's size
- Create schedules that mirror your lifestyle
- Customise your Nova interface's appearance
- Discover added smarts through advanced controllers
- Select mood enhancing smart lighting colours
- Control via voice, app or touch effortlessly

Wall controllers

Comfort You Can Count On

The Nova Wall Controller redefines home climate perfection. Advanced engineering delivers the exact airflow each room deserves, maintaining temperatures within one degree of your chosen setting. With adjustable airflow from 0% to 100% across 14 zones, Nova orchestrates comfort that wraps every space in ideal conditions. Experience climate control so intuitive it anticipates your needs before you do.

Climate by Design

Nova transforms everyday spaces into personal comfort zones. Its intuitive touchscreen and architectural precision create environments that feel naturally perfect, bringing sophisticated climate control to every room in your home.

Energy Efficient for a Greener Tomorrow

iZone's intelligent sensor network monitors every room individually, delivering comfort that single sensor systems simply cannot achieve. Our exclusive Advanced Constant Control and Bypass Control technologies adapt seamlessly to your home's unique layout, balancing ideal comfort with real savings. Track your weekly energy patterns through clear visual displays that help you discover smarter usage habits. Select Smart Monitoring, Economy Settings and Fan Auto Control to create an efficient home that reduces household carbon emissions by up to 68% while maintaining perfect comfort throughout.

Nova

Your imprint on perfect comfort

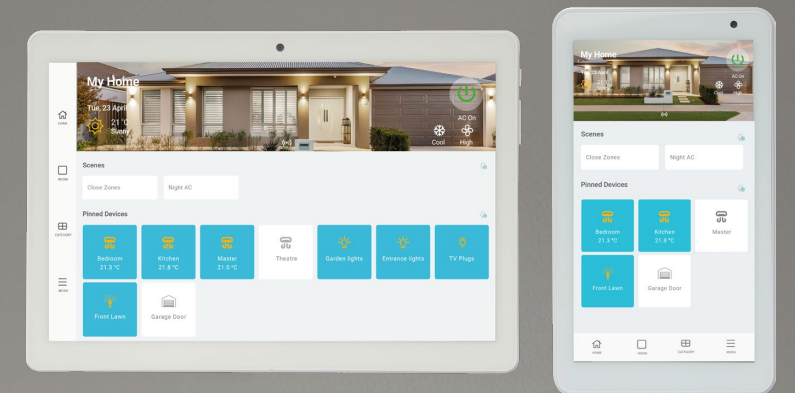

No two homes are the same and neither are our solutions. iZone lets you customise your home to fit your unique lifestyle, from climate control to lighting and more. The Nova Wall Controller enables personalised automation schedules, quick access to favourite devices and the option to invite family members to customise their screens. Available in 7-inch or 10-inch sizes, its elegant design seamlessly complements your interior. With additional features like temperature sensors and energy-saving functions, the Nova adapts to your specific needs, reflecting your individuality.

Effortless Control, Endless Convenience

Imagine a home that listens to you. Whether you're across the room or across the world, iZone puts you in control of your home's environment with a simple tap or voice command. The Nova wall controller comes with a 5-year warranty and is perfect for double-storey homes, allowing you to monitor multiple iZone systems and air conditioning units from a single App. Why wait? Free up your time for what matters most.

Nova and Nova Mini Wall Controllers

The Nova transforms climate control into an art form. Available in two elegant sizes, these touchscreen controllers orchestrate your entire comfort ecosystem with effortless precision, while their refined presence enhances your interior design language.

Choose the display that suits your space:

- Nova – 10" colour touchscreen (1920 x 1200 resolution)
- Nova Mini – 7" colour touchscreen (1024 x 600 resolution)

Both controllers deliver:

- Precise control for up to 14 zones with adjustable airflow
- Integrated Smart Hub connecting your entire home ecosystem
- Portrait or landscape mounting to complement your space
- Real-time energy monitoring and historical usage data
- Voice control through Alexa, Google Home and Apple Home
- Mobile app access from anywhere in the world
- 5 year Australian warranty protection

Naked

Complete Control, without a wall controller

Enjoy full Nova Wall Controller functionality without installing one. Your phone controls all, leaving walls clear. This budget option saves instantly and lets you add a wall controller later when funds allow.

- Monitor real-time energy consumption patterns
- Adjust temperatures before arriving home
- Control multiple zones with intuitive gestures
- Create personalised climate schedules that adapt

iZone Smart Hub

The iZone Smart Hub unlocks your home's full potential by connecting every comfort system to the cloud. This intelligent gateway transforms basic zone control into sophisticated home automation.

- Enable complete climate control from anywhere
- Create automated recipes with custom triggers
- Programme intelligent schedules around your lifestyle
- Connect lighting, irrigation and security seamlessly

Nite

Nite Wall Controller

The Nite Wall Controller brings sophisticated zone control to your ducted climate system at exceptional value. Its intuitive LCD interface manages six zones through simple button controls, delivering personalised comfort without complexity. Perfect for homeowners seeking reliable climate management.

Remote connectivity through Smart Hub integration elevates the Nite beyond traditional controllers, enabling smartphone access and automated scheduling. The backlit display ensures effortless operation day or night, while precise airflow adjustments deliver the comfort each room requires.

- Control six zones with dedicated activation buttons
- Adjust airflow precisely in five percent increments
- Monitor real-time temperature through sensing
- Access remotely with optional Smart Hub upgrade
- Choose from 10 pre-programmed zone names

Nimble

Nimble Wall Controller

The Nimble Wall Controller delivers essential zone control with refreshing simplicity for budget-conscious homeowners. This streamlined controller manages up to six climate zones through straightforward push-button operation, bringing basic zone control to every room without complex features.

Blue LED indicators illuminate active zones at a glance, while the spill protection function safeguards your system from overpressurisation automatically. The Nimble operates independently of internet connections, ensuring your comfort control is always available.

- Simple on/off control for six individual zones
- Blue LED indicators show active zone status
- Spill protection prevents system damage
- Option for second controller at dual locations

Peace of mind

Australian Owned

Engineered in Perth to perform flawlessly across Australia's diverse climates from tropical to alpine

No Locked-in Contracts

Your home, your rules with complete flexibility to upgrade, expand or modify systems anytime

Affordable and Scalable

Start within your budget today and expand tomorrow as iZone systems grow with you

Safety and Security

Your privacy matters with our Embedded Smart Hub keeping control data secure within home

Dedicated Customer Support

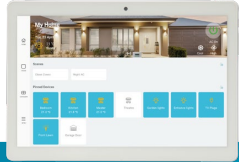

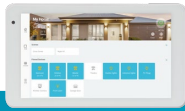

Experience genuine local support from our Perth team delivering personalised solutions every time

Trusted by Thousands

Total Control Made Simple

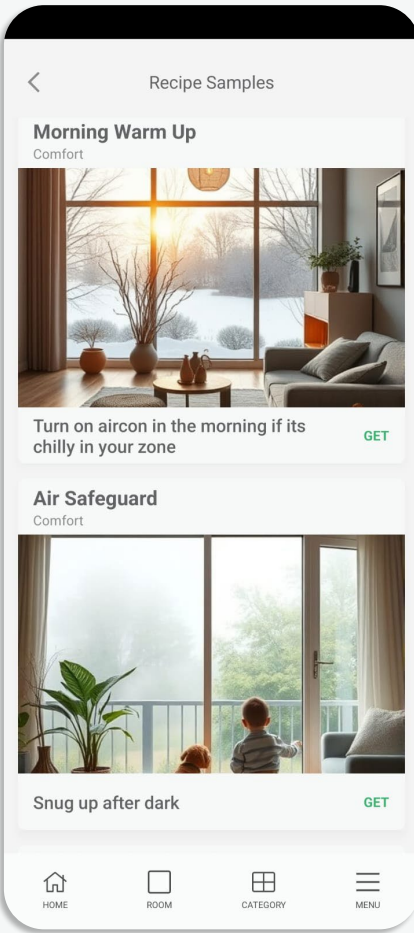

Voice Control

Command your entire home ecosystem through natural conversation. Air conditioning responds instantly alongside lighting, irrigation, garage access, automated blinds and more with leading smart device platforms.

Remote Control

Transform your smartphone into a powerful home command centre. Adjust temperatures before you arrive, monitor energy usage from abroad, and orchestrate your entire smart ecosystem through intuitive touch controls. Your home responds instantly wherever life takes you, delivering seamless comfort while maximising security through intelligent automation.

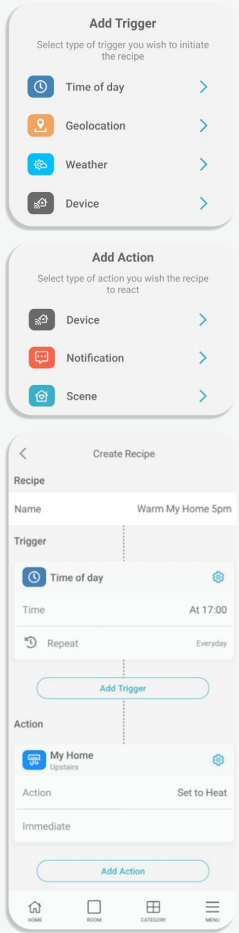

Recipes

iZone's signature 'recipe' feature transforms daily routines into automated perfection, creating scenarios that anticipate needs while maximising comfort and minimising waste.

- Triggers respond to time schedules, location awareness, weather changes or device status, while actions orchestrate multiple systems, activate personalised scenes or deliver timely notifications.

Example: Set your air conditioning to switch on automatically when the outside temperature reaches 30°C.

Design responses for weather, automatically cooling spaces and adjusting blinds when temperatures exceed twenty eight degrees, maintaining comfort while protecting your energy investment.

Smart Home Integration

Smart Downlights

Smart Globes

Dimmer Switch

Smart Lights

Transform every moment with lighting that understands your life. From vibrant dinner parties to quiet evenings, create the perfect atmosphere instantly.

- 16 million colours and 100 white shades
- Use 80% less energy with a 40,000-hour lifespan
- Control your lights from anywhere in the world
- Dim to 2% for ultimate comfort

Smart Plug

Wireless Relay Module

Smart Plugs

Every appliance becomes brilliant. Transform devices into companions that respond to your schedule, save energy, and simplify your daily routines effortlessly.

- Pair and control in seconds
- Smartphone or wall controller access
- Manual override button for instant control
- Voice control with Alexa and Google

Wireless Power Monitoring Kit

Smart Power Monitoring

Track your home's energy "heartbeat" in real time. Schedule appliances for off-peak rates and watch your bills shrink while your solar panels work overtime.

- Live circuit data exposes hidden energy waste
- Schedule large loads for cheaper off peak rates
- Schedule appliances in daylight to use free solar
- Track trends and get alerts for excess draw

Smart Garage Door Controller Kit

Smart Garage Door

Welcome home before you arrive. Your garage anticipates your schedule, grants access to guests securely, and alerts you to unexpected activity instantly.

- Automated arrival scheduling
- Secure guest access without keys
- Real-time alerts and monitoring
- Seamless home automation integration

Smart Irrigation Controller

Smart Irrigation

Your garden thrives while you relax. Smart watering adjusts to weather patterns and soil needs, delivering precision care that saves water and money effortlessly.

- Control 8-24 stations independently
- Weather-responsive automatic adjustments
- Remote troubleshooting via mobile app
- Efficient soak-and-cycle programs

Roller Blind Module

Smart Blinds

Natural light becomes your design partner. Blinds respond to sun patterns, maintaining perfect temperatures while creating privacy and security.

- Reduce energy waste across summer and winter
- Wake naturally by setting blinds to open at dawn
- Create a lived-in appearance when away
- Schedule or control remotely with ease
- Compatible with motorised blinds
