Navi Wall Controller

Designed for the homeowner who values simplicity and affordability without compromise.

The Navi Wall Controller combines reliable zone control with a contemporary look and feel, so you can enjoy the latest climate control technology without the complexity. All the features that matter, at a price that makes it an easy choice.

The Navi Wall Controller brings seamless zone control to your ducted climate system at exceptional value. Its touchscreen interface effortlessly controls up to eight zones. The backlit display ensures easy operation day or night, while precise airflow adjustments deliver the comfort each room requires. For ultimate convenience, smart connectivity elevates the Navi beyond traditional controllers, putting smartphone access right at your fingertips.

Smart climate control, accessible to every home

Control up to eight zones from the wall or from your phone | IOS & Android

Features

Core System & Compatibility

- Integrates with all major brands of ducted reverse-cycle air conditioning units.
- Operates as a wired wall controller to adjust set points, airflow, fan speeds, AC modes, and zone status.
- Eliminates the need for an additional OEM (original equipment manufacturer) controller.
- Supports both standard electronic and fixed constant zones.
- Does not expand to operate smart home devices.
- Displays AC unit error codes for easy troubleshooting.

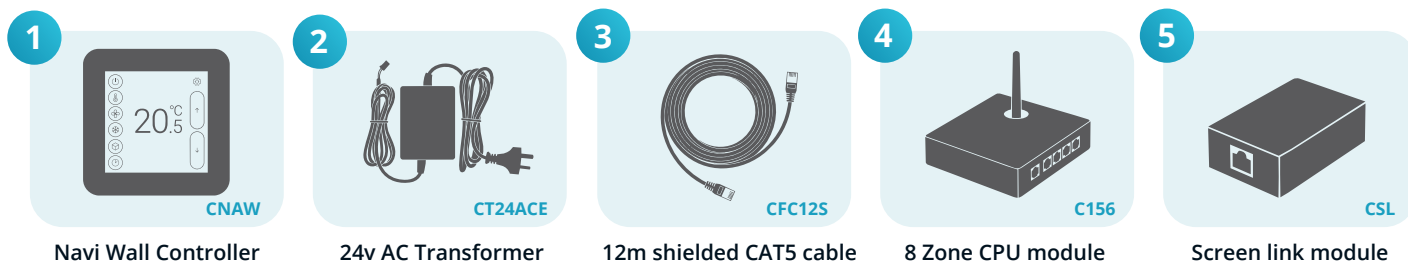

Zone & Airflow Control

- Controls up to 8 zones.
- Adjusts airflow precisely in 5% increments for fine-tuned comfort.
- Features a built-in temperature sensor for reliable zone control.
- Offers a choice between remote temperature control (touch screen) or return air control.
- Supports the connection of multiple Navi screens to single AC unit.
- Permits full customisation of zone names.
- Does not support remote zone temperature sensors.

Core System & Compatibility

- Modern 4.3-inch high-resolution wall-mounted touchscreen.
- Smart phone control from any Android or iOS devices.
- Includes both light and dark mode interfaces.
- Offers a choice of three pre-programmed display themes.
- Features a programmable timer with dedicated start and stop times.
- Sleep mode delays the system shutdown based on predefined intervals of minutes or hours.
- Supports remote software updates.
